PROFILE

2+ years of professional experience as a Front End Developer, providing my skills to a company that helps a wide variety of clients across all industries, from local start-ups to Fortune 500 companies. Comfortable working as part of a team and passionate about using my creative background to develop attractive and dynamic web applications.

EXPERIENCE

Americaneagle.com

July 2019-present

Front End Developer

Responsible for implementing visual and interactive elements through a variety of web applications and content management systems. Coordinated efforts with team members to build new sites and update existing projects.

- Developed and maintained web projects for both B2B and B2C companies
- Implemented responsive, accessible, and cross-browser compatible front end designs
- Performed page speed audits and processed metrics in order to improve web page performance.
- Practiced agile development methodology
- Assisted in the execution of digital marketing campaigns (SEO, email/newsletter templates)

Examples of completed projects:

renown.org (Sitecore)

spray.com (Sitecore)

weathertech.com (idev)

chicagowolves.com (WordPress)
